LANGUAGES

English — Advanced

Filipino — Expert

SUMMARY

9+ years building and maintaining full-stack web applications across Laravel, WordPress, and modern JavaScript frameworks. Experienced managing multi-server Hub & Spoke deployments, building CI/CD pipelines with GitHub Actions and Bitbucket Pipelines, and shipping custom WordPress plugins, shortcodes, and REST API integrations. Proficient with AI coding tools (Claude Code, GitHub Copilot, Cline) to accelerate delivery and automate code review workflows. Remote-first, with a proven track record of client work across Australia, Denmark, Canada, and the US.

EXPERIENCE

WordPress Developer (WFH)

May 2025 – Present

Wing Assistant - VoltContent (OMG-Technologies) · Denmark

- Managed and maintained multiple WordPress servers across a Hub & Spoke distribution architecture, handling server provisioning, deployments, and DevOps workflows.
- Built and maintained custom WordPress plugins, including a custom schema plugin for SEO structured data markup.
- Created reusable UI shortcodes with server-side rendering, implementing Figma design components directly into the WordPress theme layer.
- Designed and implemented CI/CD automation workflows using GitHub Actions, including automated Claude Code reviews on pull requests and Hub & Spoke distribution to local servers.
- Centralized Google Analytics tracking across multiple WordPress properties, ensuring consistent data integrity.
- Authored executable cleanup scripts for WordPress residue removal, reducing manual maintenance overhead.
- Led performance optimization initiatives across WordPress servers, targeting Core Web Vitals improvements through caching and asset optimization strategies.

Software Developer (WFH)

Dec 2024 – Mar 2025

True Wealth Pty Ltd · Australia

- Delivered multiple projects and third-party integrations across Angular, Laravel, and Zoho CRM.
- Fixed critical bugs and built new features supporting the company's daily financial operations, ensuring minimal downtime.

Software Developer (WFH)

Mar 2024 – Dec 2024

GameTruck · Phoenix, Arizona

- Developed and maintained robust Laravel applications, ensuring reliability and performance for a nationwide entertainment services company.
- Migrated the entire frontend codebase from legacy CSS to Tailwind CSS, standardizing the UI layer and reducing stylesheet complexity.
- Built and leveraged a Laravel reusable component library to accelerate feature development and enforce consistency across the codebase.
- Designed and implemented a secure payment system integration, handling payment processing workflows end-to-end.

Software Developer (WFH)

Apr 2023 – Nov 2024

HeyBlinds · Montreal, Quebec

- Developed and maintained a full e-commerce platform on the Laravel framework with JavaScript and jQuery front-end enhancements, supporting the company's primary revenue channel.
- Implemented complex UX features to streamline product navigation and improve conversion flow.
- Built REST API integration for email marketing campaigns, enabling automated customer communication workflows.
- Executed on-page and technical SEO improvements, including Core Web Vitals optimizations, to grow organic search visibility and rankings.

Software Developer

Local Government Unit of Quezon, Bukidnon · Quezon,
Bukidnon, Philippines

- Developed and maintained full-stack Laravel applications serving departmental workflows across the municipal government.
- Designed and built a custom document tracking system that streamlined approval and routing workflows across departments.
- Established secure network infrastructure (Active Directory, Group Policy, IIS, DHCP, DNS) for a community hospital, improving uptime and access control.
- Co-founded and helped operationalize the new Management Information System (MIS) Office Division; led and managed a team of developers and technical staff.
- Built the public-facing LGU Web Portal using Vue.js 3, Tailwind CSS, and Axios, making municipal services and information accessible online.

IT Help Desk Technician

Jan 2018 – Feb 2019

Commission on Elections · Quezon, Bukidnon, Philippines

- Provided network and desktop support during critical election periods.
- Diagnosed and resolved 1,000+ voter registration issues over the year, ensuring accurate electoral data.
- Processed 1,000+ new voter registrants and transferees, maintaining compliance with COMELEC standards.
- Maintained and updated voting machine software ahead of national elections.

Software Developer / IT Help Desk

Aug 2017 – Jan 2018

Associated Bukidnon Sugarcane Farmers, Inc. · Quezon,
Bukidnon, Philippines

- Provided network and desktop support across the organization.
- Maintained and updated existing .NET applications.
- Created and maintained network, software, and hardware documentation.

Software Developer

Aug 2016 – Jul 2017

University of the Immaculate Conception · Davao City,
Philippines

- Built and maintained internal web applications used by students and staff across the university, focusing on usability and adoption.

PROJECTS**Volt Whisper**
<https://github.com/JSON-FX/volt-whisper>

macOS menu bar dictation utility using on-device speech recognition and AI transcript polishing.

- Built with Swift/SwiftUI using Apple's SFSpeechRecognizer with on-device recognition enforced — audio never leaves the device.
- Integrated Claude Haiku API to clean and reformat raw transcripts into formal, professional, or casual output styles.
- Implemented global hotkey system via Carbon framework; API key stored securely in macOS Keychain.

CopyTraderX
<https://github.com/JSON-FX/copytraderx>

Single-admin Next.js tool for managing MetaTrader EA license distribution.

- Built a Next.js admin dashboard to manage and distribute CopyTraderX-Impulse EA licenses.
- Handles license key generation, activation tracking, and user management for trading automation software.

Metatrader 5 Live Journal
<https://github.com/JSON-FX/Metatrader-5-Live-Journal>

SSH-based live trade journal connecting a MetaTrader 5 VPS to a local server.

- Streams live MT5 trade data from a remote VPS to a local server over SSH for real-time journaling.
- Enables traders to monitor and log positions without exposing the trading environment directly.

EDUCATION

University of the Immaculate Conception

Jun 2012 – May 2016

Bachelor of Science in Information Technology, Specialized in
Software Engineering
